100% Acrylic Premium Grade Pavement Sealer

A Pavement Maintenance Program That Includes Periodic Sealcoating And Crack Filling Will More Than Double The Service Life Of Asphalt Pavement.

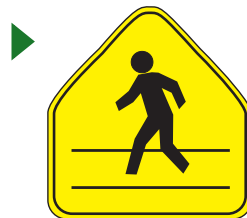

- Scheduled Pavement Maintenance Program Curve
 - Pavement Deterioration Curve - No Scheduled Maintenance

► Product Description...

SealMaster Acrylic Pavement Sealer is a premium quality 100% acrylic emulsion designed for coating asphalt pavement surfaces. The acrylic sealer is job-mixed with select aggregate and applied to the pavement surface producing a durable, slip resistant coating. SealMaster Acrylic Pavement Sealer resists scuffing and tracking into buildings and onto floors. It is also resistant to fuel and chemical attack.

• **Product Uses:** driveways, parking lots, cart, jogging, and bike paths, and other asphalt pavement surfaces.

► SealMaster Acrylic Pavement Sealer...

A safer pavement sealer for pedestrian and vehicle traffic. High level of aggregate produces a surface coating with exceptional skid resistance in both wet and dry conditions. Provides property owners with a safer pavement for both motorists and pedestrians.

► Sealed vs. Unsealed...

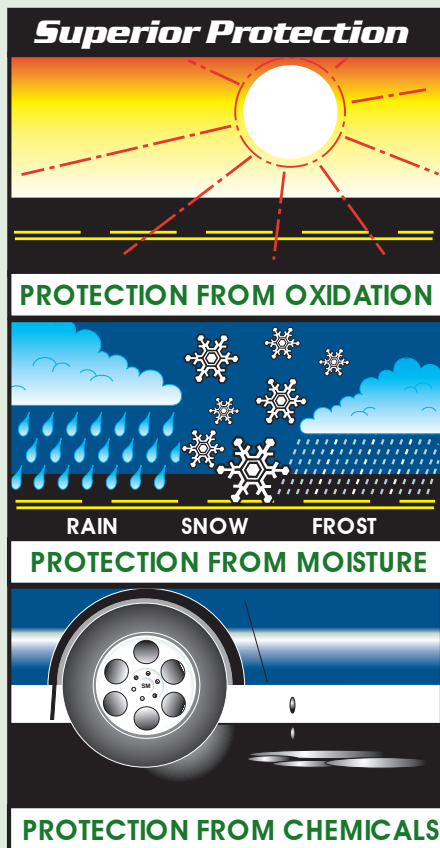

Problem: Left untreated, asphalt pavement will deteriorate rapidly. The asphalt binder that holds the pavement together begins to oxidize and weather soon after installation. Moisture penetrates the asphalt causing further damage and deterioration to the pavement.

Solution: SealMaster Acrylic Pavement Sealer replenishes the binder that is lost through weathering and aging, and provides superior protection against environmental distress.

Sealed vs. Unsealed

SealMaster Acrylic Pavement Sealer restores the original black color to asphalt and greatly enhances the overall appearance of your property.
